

[Mastering Circular Business with the Value Hill \[1\]](#)

This paper targets businesses who aspire to transition to a more circular model. The paper advocates for and describes a circular business model (or rather collection of business models) and transition tool called the Value Hill. The value hill provides businesses with detailed information regarding how to best transition to a circular model as well as nuanced descriptions of best practice options. A key component of the Value hill is Network Organization which is an overarching concept/model/tool that encourages increased efficiency and circularity through collaborative partnerships and increased transparency.
