

TRIS [1]

Industrial Symbiosis (IS) is a building block of the Circular Economy, a means to sustainable growth increasing resource efficiency and SMEs competitiveness and resiliency (COM(2014) 398 final/2). Despite the acknowledged advantages, IS is not yet fully widespread. The challenge TRIS is facing is to enable a systemic uptake of IS in 5 European regions, supporting policy makers to increase the competitiveness of their SMEs by introducing IS practices. To do so, the TRIS consortium will: Identify facilitating elements and obstacles and embed them in (or remove them from) the appropriate policy instruments; Reach out and engage with the actors that can drive and/or be impacted by the change and involve them in structured local networks.
