

[Achieving 'Growth Within' \[1\]](#)

"An additional €320 billion of circular economy investment opportunities is available to investors in the European Union (EU) until 2025 that can be unlocked through modest action by policy makers or industry. This investment would put the EU on the path to seize the economic, societal, and environmental benefits of the transition to a circular economy and mitigate the mounting risks that reside in conventional industrial assets in an era of rapid change." (p. 10)
